ATTACHED DOCUMENTATION AND MEDICAL TREATMENT
❒ Medical report or medical prescription.
❒ Medication in its original labeled containers to be kept at school during the treatment.
❒ Medication in its original container that will go to school and return home every day.

Signature: Date:

The authorization to dispense medication must be sent well in advance electronically, hand-delivered to the nurse, or presented at the school's Concierge/Secretary's Office together with the medication to be provided.
In case of electronic communication, its receipt and reading must be verified.

MEDICATION ADMINISTRATION GUIDELINES

- Medication that parents have purchased on their own, without a prescription from the doctor, will not be administered. Any medication taken that is not provided by the School Nurse will not be the responsibility of the School Nurse.
- The medication is delivered in the original packaging together with the manufacturer's package leaflet, and clearly labelled with name, surname and school year. Accompanied by a doctor's prescription with the relevant dosage and days of treatment.
- During treatment, medication will remain in the custody of the school infirmary and will be returned to the family at the end of treatment.
- Reconstitution of medicines will be carried out by the nurse.
- Medicines that do not come in their original packaging shall not be administered, nor shall loose pills or pills deposited in packaging other than the original packaging.
- If the medicine needs to be kept cold, it shall be stored in the refrigerator provided for this purpose in the infirmary.
- At no time should the student carry medication on his or her person.
- Parents or guardians should hand in the medication to the tutor, nurse or at the school secretary's office.
- If students travel by bus, the medication will be handed over to the person responsible for the route.
